Potential Benefits

- Infrastructure Investment:** The 2021 Bipartisan Infrastructure Law has directed \$1.2 trillion of US federal funds towards transportation, energy, and climate infrastructure projects through 2026, driving significant continued demand for construction services.¹
- Federal Funding:** To date, over \$400 billion in federal funding authorized by the 2021 Bipartisan Infrastructure Law has been allocated to over 40,000 infrastructure projects across the US, including \$200 billion to road, bridge, airport, rail, and waterway investments alone.²
- State Spending:** Capital investment in infrastructure as a share of state and local government spending has risen at its highest rate since 1979, reversing the decades-long decline and stagnation in infrastructure spending.³

The Solactive United States Infrastructure Index (SOLUSIST) identifies companies that derive their revenues from building materials/equipment, construction, logistics, or engineering services.

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized.

ALPS Distributors, Inc (1290 Broadway, Suite 1000, Denver, Colorado 80203) is the distributor for the Themes ETFs Trust.

Investing involves risk, including the possible loss of principal. Narrowly focused investments typically exhibit higher volatility. Investments in infrastructure-related companies have greater exposure to the potential adverse economic, regulatory, political and other changes affecting such entities. Investment in infrastructure-related companies are subject to various risks including governmental regulations, high interest costs associated with capital construction programs, costs associated with compliance and changes in environmental regulation, economic slowdown and excess capacity, competition from other providers of services and other factors. HWAY is non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share, and do not represent the returns you would receive if you traded shares at other times. NAVs are calculated using prices as of 4:00 PM Eastern Time. Indices are unmanaged and do not include the effect of fees, expenses, or sales charges. One cannot invest directly in an index.

Carefully consider the funds' investment objectives, risk factors, charges, and expenses before investing.
