

## Fund Summary

As of 31 December, 2025

The Themes Humanoid Robotics ETF (BOTT) seeks to track the Solactive Global Humanoid Robotics Index (SOLGHRBN), which identifies the largest 30 companies with a positive total return over the past 12 months in the following industry groups: Factory Automation Equipment, General/Processor/Specialized Semiconductors, Industrial Machine Parts and Support Equipment, Programmable Logic and ASIC Semiconductors. BOTT seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the SOLGHRBN Index.

## Potential Benefits

### Humanoid Robots:

Robots are expanding from factories into homes and workplaces. A \$6 billion market for human-sized robots is expected within 10–15 years, potentially filling 4% of the U.S. manufacturing labor gap by 2030 and 2% of global elderly care needs by 2035. Advances in AI and robotics, along with their human-like form, let them work in existing spaces and adapt to various tasks.

### Rising Automation:

The global humanoid robot market, valued at \$2.43 billion in 2023, is projected to grow to \$15.26–\$66 billion by 2030–2032 at a CAGR of 39.2–45.5%, fueling investor interest.

### Robotic Revolution:

Robotic technology is expected to keep expanding, with an aggressive scenario predicting that robots will quadruple worldwide by 2025.

Investing involves risk, including the possible loss of principal. The investable universe of companies in which BOTT may invest may be limited. The Fund invests in securities of companies engaged in Information Technology, which can be affected by rapid product obsolescence and intense industry competition. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. BOTT is non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share, and do not represent the returns you would receive if you traded shares at other times. NAVs are calculated using prices as of 4:00 PM Eastern Time. Indices are unmanaged and do not include the effect of fees, expenses, or sales charges. One cannot invest directly in an index.
