

Fund Summary

As of Jun 30, 2026

The Themes Silver Miners ETF (AGMI) seeks to track the STOXX Global Silver Miners Index (STXSILVV), which identifies companies that derive their revenues from silver mining. AGMI seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the STXSILVV Index.

Potential Benefits

Industrial Inputs:

Global industry continues to drive demand for silver production; at 710 million ounces in 2023, industrial demand for silver has risen over 55% since 2015 and is at an all-time high.

Inception Date: May 3, 2024. Past performance is not a reliable indicator of future performance. Current performance may be higher or lower than that quoted. All results are historical and assume the reinvestment of dividends and capital gains. Visit themesetsf.com for most recent month-end performance. Performance is shown net of fees.

Performance is shown on a total return basis (i.e., with gross income reinvested, where applicable). Cumulative return is the aggregate amount that an investment has gained or lost over time. Annualized return is the average return gained or lost by an investment each year over a given time period.

The performance data quoted represents past performance. Past performance does not guarantee future results. The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. One cannot directly invest in an index.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Narrowly focused investments may be subject to higher volatility. There are additional risks associated with investing in silver and the silver mining industry. AGMI is non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share, and do not represent the returns you would receive if you traded shares at other times. NAVs are calculated using prices as of 4:00 PM Eastern Time. Indices are unmanaged and do not include the effect of fees, expenses, or sales charges. One cannot invest directly in an index.
